

How to remove NextCloud apps from the Terminal

The occ console is located in the Nextcloud sub-directory, so you need to change to that directory first (so customize the path in the following cd command to lead to the NextCloud sub-directory):

```
cd /var/www/PATH_T0/nextcloud
```

If you don't know the exact name of the app that you plan to disable, you can list all apps with:

```
sudo -u www-data php occ app:list
```

Remember, the occ console is located in the Nextcloud directory, so make sure that you change to that directory first before issuing the command to disable the app (customize the path to lead to the nextcloud sub-directory):

```
cd /var/www/PATH_T0/nextcloud  
  
sudo -u www-data php occ app:disable NAME_OF_APP
```
