

# Add a web.config file to the root of your DokuWiki website

Add a web.config file to the root of your DokuWiki website to block web access to these directories: /data/, /conf/, /bin/, and /inc/.

## web.config

```
<?xml version="1.0" encoding="UTF-8"?>
<configuration>
  <system.webServer>
    <security>
      <requestFiltering>
        <filteringRules>
        </filteringRules>
        <denyUrlSequences>
          <add sequence="/data/" />
          <add sequence="/conf/" />
          <add sequence="/bin/" />
          <add sequence="/inc/" />
        </denyUrlSequences>
      </requestFiltering>
    </security>
  </system.webServer>
</configuration>
```
