

Install OnlyOffice Docs on Ubuntu server 22.04

Step By Step

See: [Install NetTools on Ubuntu Server to enable ifconfig command](#)

```
sudo apt install net-tools
```

Check the current dynamically assigned version 4 IP address on the server using ifconfig command.

```
ifconfig

en0: flags=4163<UP,BROADCAST,RUNNING,MULTICAST> mtu 1500
      inet 192.168.2.163 netmask 255.255.255.0 broadcast 192.168.2.255
lo: flags=73<UP,LOOPBACK,RUNNING> mtu 65536
      inet 127.0.0.1 netmask 255.0.0.0
```

See: [Configure Static IP Address on Ubuntu Server 22.04](#)

Make a backup the network configuration installer file.

```
$ cd /etc/netplan/
user@svr:/etc/netplan$ ls
00-installer-config.yaml

user@svr:/etc/netplan$ sudo cp -v 00-installer-config.yaml 00-installer-
config.bak
'00-installer-config.yaml' -> '00-installer-config.bak'

user@svr:/etc/netplan$ ls
00-installer-config.bak  00-installer-config.yaml

user@svr:/etc/netplan$ 

user@svr1:/etc/netplan$ sudo vim 00-installer-config.yaml
```

Here is the original dhcp configuration for eno1.

```
# This is the network config written by 'subiquity'
network:
  ethernets:
    eno1:
      dhcp4: true
  version: 2
```

Change this configuration to the following:

Last update:
2023/06/29 install_onlyoffice_docs_ubuntu_server_22_04 https://www.installconfig.com/doku.php?id=install_onlyoffice_docs_ubuntu_server_22_04
05:24

```
# This is the network config written by 'subiquity'  
network:  
    renderer: networkd  
    ethernets:  
        eno1:  
            addresses:  
                - 192.168.2.163/24  
            routes:  
                - to: default  
                  via: 192.168.2.1  
            nameservers:  
                addresses: [8.8.8.8,4.4.4.4,192.168.2.1]  
            dhcp4: no  
        version: 2
```

Apply the network changes:

```
sudo netplan apply
```

Restart Network Service

```
sudo systemctl restart systemd-networkd.service
```

Run ifconfig to check the static network configuration

```
ifconfig -a  
  
eno1: flags=4163<UP,BROADCAST,RUNNING,MULTICAST> mtu 1500  
      inet 192.168.2.163 netmask 255.255.255.0 broadcast 192.168.2.255  
lo: flags=73<UP,LOOPBACK,RUNNING> mtu 65536  
      inet 127.0.0.1 netmask 255.0.0.0
```
